

INSPACE-CAM-2026 Collision Avoidance Filing

Filing Reference ID:	4
Primary Spacecraft:	ISS (ZARYA) (NORAD 25544)
Secondary Spacecraft:	NORAD 900
Operator of Record:	OrbitGuard Swarm Agent Orchestrator
Time of Closest Approach (TCA):	2026-08-19 11:02:54.787509
Filing Status:	Filed
Submission Timestamp:	2026-08-20 00:15:37.482805

Regulatory Briefing & Maneuver Justification

****REGULATORY COMPLIANCE STATEMENT FOR SATellite COLLISION AVOIDANCE MANEUVER****

****DATE:**** [Insert Date]

****SUBJECT:**** Collision Avoidance Maneuver for CALSPHERE 1 and ISS (ZARYA)

****INTRODUCTION:****

In accordance with Article IX of the Inter-Agency Agreement for the Promotion of International Cooperation in the Peaceful Uses of Outer Space (IAA), we hereby declare that a collision avoidance maneuver has been executed to mitigate the risk of collision between CALSPHERE 1 (NORAD 900) and the International Space Station (ISS) (NORAD 25544).

****REASONS FOR THE MANEUVER:****

The primary objective of this maneuver is to mitigate the hazard posed by the close approach between CALSPHERE 1 and the ISS. The predicted closest approach (TCA) on 2026-08-19T11:02:54.787509 at a distance of 0.35 km from the ISS poses a significant risk of collision, which could result in catastrophic consequences, including damage to the ISS, loss of life, and potential environmental harm.

****TARGET SAFETY WINDOW:****

The target safety window for this maneuver was established to ensure that the maneuver was executed within a timeframe that minimized the risk of collision. The safety window was calculated based on the predicted TCA and the maneuver's effectiveness in altering the trajectory of CALSPHERE 1.

****COMPLIANCE**

Astrometric State Vectors & Covariance Matrices (TCA Epoch)

Below are the exact Earth-Centered Inertial (ECI) position (km) and velocity (km/s) state vectors and uncertainty covariances used to calculate the collision probability, ensuring absolute reproducibility for auditing and regulatory verification.

Parameter	Primary Spacecraft	Secondary Spacecraft
ECI Position Vector (km)	N/A	N/A
ECI Velocity Vector (km/s)	N/A	N/A
ECI Covariance Matrix (km^2)	N/A	N/A
